Be ready for SAP S/4HANA®

Stay Compliant with New Statutory IFRS15 and ASC 606 Revenue Standards

Automate and Streamline Your Revenue Recognition Process

SAP Revenue Accounting and Reporting helps business manage new IFRS15 regulations for countries that must adhere to US GAAP and IFRS. The application enables compliance with new statutory regulations for revenue recognition, such as IFRS 15, while also supporting existing requirements. SAP Revenue Accounting and Reporting handles orders, invoices, and events from multiple SAP and non-SAP systems, providing flexibility by decoupling revenue recognition rules from order entry and billing systems.

Did you know?

- Clients planning to convert to SAP S/4HANA® must migrate everything from SD based revenue recognition to SAP Revenue Accounting and Reporting prior to an SAP S/4HANA conversion. Once SAP S/4HANA is implemented, SD Revenue Recognition is no longer supported by SAP systems.
- Without SAP Revenue Accounting and Reporting there is a need for offline calculations which can be error prone and can cause issues during audit.

Why implement SAP Revenue Accounting and Reporting?

- Creates a user-friendly solution to automate and simplify revenue recognition and accounting processes
- Increases flexibility by decoupling revenue realization rules for ordering and billing systems
- Guarantees compliance with new or applicable legal provisions
- Builds scalability through use of the SAP architecture and the benefits of parallel processing
- Fosters smooth connection to other SAP and non-SAP systems through the Adapter Framework
- Is mandatory for a move to SAP S/4HANA
