Walldorf Consulting AG

SAP UI5 & Fiori

User Experience
A well-designed user interface puts User Experience in the foreground.

Human centricity is key for the success of your company
Walldorf Consulting AG will assist production of your applications from start to launch. We offer multiple design sessions to address challenges faced by your company, together discovering solutions.

Our Value Added
Walldorf Consulting AG has successfully delivered custom SAP UI5 apps and apps using SAP Fiori elements to many customers.

Together with SAP®, our engineers have developed standard SAP Fiori® applications for core modules.

Walldorf Consulting AG A Strong Partner
Our engineers are certified and can provide deep insights into SAP solutions, thanks to a close partnership with SAP.

Take the Next Step Towards the Intelligent Enterprise

Increase efficiency by focusing on employee and customer experience

Human centricity is one of the key success factors for your company
Modern enterprise systems are used by different user groups that have individual requirements for the systems. With an adapted user interface (UI), the user experience (UX) and thus the acceptance of the applications can be significantly increased.

The strategic approach to designing user interfaces in SAP systems of the future is called SAP Fiori®. The technology behind Fiori is UI5 and enables a fast and easy realization of Fiori applications. SAP Fiori helps improve productivity by leveraging the advantages of a simplified workflow, designed to reduce the number of clicks required to complete a task. Switching to SAP Fiori improves mobile user experience. The simple interface enables work from touch screens on mobile apps for Android, iOS devices. The consistent behavior and design help users to expect a similar experience regardless of their device, allowing ease of access to SAP Fiori applications anywhere and anytime.

SAP Fiori & UI5 deliver UX for the intelligent enterprise, evolving the way businesses work. SAP equips designers and developers with a set of tools and guidelines to create apps for any platform faster than ever, providing a consistent, innovative experience for both creators and users. SAP Fiori helps enable businesses to turn new ideas into great apps quickly, so they can meet rapid market demands.

Any new product can be moved to SAP Fiori for a consistent, end-to-end experience. SAP Fiori is part of mostly all new SAP products like SAP S/4HANA®, SAP Integrated Business Planning for Supply Chain, SAP C/4HANA®, or SAP® SuccessFactors®.

Putting customer experience first
Walldorf Consulting AG is here to help you empower customers and employees, by putting experience first. We adhere to SAP Fiori design guidelines, to ensure consistent user experience in SAP Fiori applications. Using SAP UI5 as frontend technology, we maintain control of design while enabling the flexibility you need to innovate.
