Real Estate Moves to SAP S/4HANA

Prebuilt processes based on SAP Best Practices

Digitalization for leasing industry

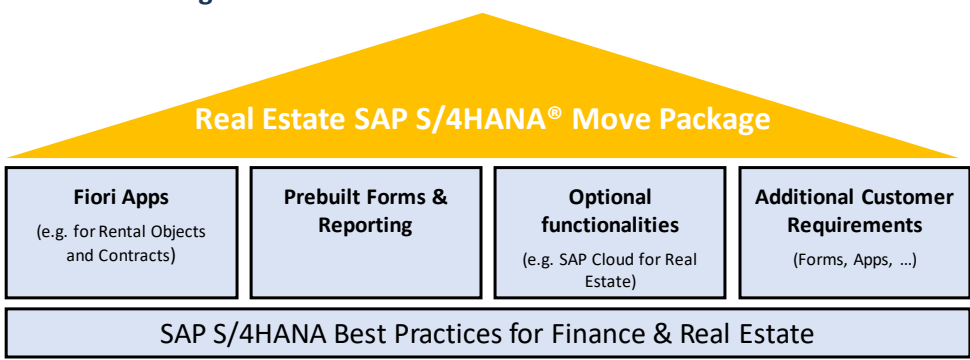

There are huge opportunities for growth in the ongoing process of digitalization for the leasing industry. Maybe you're a real estate company using an SAP ERP system with Flexible Real Estate Management (RE-FX) in place or you're a new company looking for an SAP state-of-the-art application. In either case you can take advantage of a higher degree of innovation than the standard provided by SAP S/4HANA core functionalities.

Fast track with a packaged solution for real estate companies

A predefined SAP S/4HANA solution package based on SAP RE-FX provides a higher degree of innovation than a standard system implementation. Benefit from:

- Ready-to-use system with faster implementation time
- Stable RE-FX functionality in core
- Innovative SAP Fiori® apps for reporting about rental objects
- A standard set of forms required for correspondence
- Preset organizational levels based on SAP S/4HANA Best Practices

Our Standard Package

In a consolidation workshop we will connect with your professionals. We will engage with your blueprint to best understand your expectations and goals. Together, we will identify the tools best suited to be developed, adapted and implemented in order to meet your needs. Prior to the implementation of the SAP S/4HANA® Movement program, we can also support you in creating a blueprint. Beyond the implementation, Walldorf Consulting AG can continue to support you for further potential development or upgrades.
